Shelving systems for hazardous substances

Safety cabinets

Open-air storage systems / projects

Fire protection container systems

Gas cylinder storage systems

Safety containers, handling systems, ...

Water endangering and flammable substances are subject to strict safety regulations, not only for storage but also for daily routine procedures such as filling off, handling and transport. According to the regulations even empty containers must be stored over collection troughs.

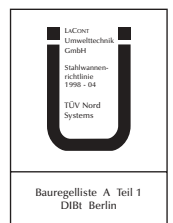

This means that favourably priced solutions that comply with the regulations are required. Floor safety elements are available for such cases.

Range of applications:

- ✎ Empty container stores
- ✎ Laying down transport paths
- ✎ Servicing transformers
- ✎ Protection against splashes and leaks

See practical info on pages 60 and 94!

- ✎ Compliance with all the requirements of the Water Management Act (WHG)
- ✎ Approved for all water endangerment categories
- ✎ Made from 3 mm sheet steel
- ✎ Individual segments can be combined with one another in any possible way
- ✎ Distance between elements: 40 mm throughout
- ✎ With removable heavy-duty fire galvanized grids
- ✎ Can be driven over by pallet trucks, on request by fork-lift trucks or road vehicles
- ✎ Galvanized for high corrosion protection

MODULAR SURFACE PROTECTION SYSTEM

Suitable for use as mobile filling, transferring and / or tanking area with Ü-mark

- ✦ Stable surface protection element
- ✦ 5/7 mm tear-drop flooring, with primer
- ✦ Welded leak-proof, with works test certificate
- ✦ Suitable for vehicles with a wheel load up to 3 tonnes
- ✦ Can be extended/retrofitted as required in modular pattern
- ✦ Other sizes and collection volumes available on request
- ✦ Supplied as individual modules for laying down quickly and without problems ---> **READY FOR USE IMMEDIATELY**
- ✦ **Floor anchors are not required as the elements are firmly laid by their own weight**
