

Collection trough systems

Shelving systems for hazardous substances

Safety cabinets

Open-air storage systems / projects

Fire protection container systems

Gas cylinder storage systems

Safety containers, handling systems, ...

These gas cylinder storehouses have been developed on the basis of our widely used and practically proven safety storehouses. Their closed construction means that their contents cannot be seen and provides ideal protection against the weather and theft.

- Outdoor storage of gas cylinders and gas cylinder pallets in accordance with TRG 280
- Stable construction from special profiled galvanized sheet steel
- Galvanized double doors with cylinder lock
- Generously sized ventilation grids on all sides
- High-loading galvanized grid-type floor; also used for ventilation
- Flexible holders and clamping belts secure individual bottles against falling over
- Delivered fully assembled
