

Small and medium-sized companies normally have a large number of different-sized containers with contents that represent an environmental hazard. If these are then to be stored at a particular location, with some of them standing and some horizontal, this frequently causes problems. In such cases our depots for hazardous substances supply the ideal solution based on legal requirements.

- ✎ Universal use due to variable inner fittings
- ✎ Lockable pneumatically sprung cover
- ✎ Storage of containers up to 220 litres capacity
- ✎ Corrosion protected by primer and lacquering or **fire galvanizing**
