

Collection trough systems

Shelving systems for hazardous substances

Safety cabinets

Open-air storage systems / projects

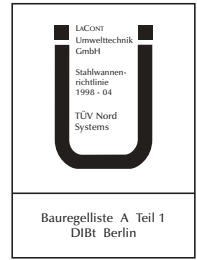

Fire protection container systems

Gas cylinder storage systems

Safety containers, handling systems, ...

By using water protection storage halls a generously dimensioned storage facility for hazardous goods can be set up quickly at a favourable price. The standard roller door (W x H 2.6 x 2.5 m) permits convenient handling with all commercially available transport aids.

- ✎ Stable construction made from specially profiled and galvanized sheet steel; statics can be tested
- ✎ Max. roof loading 180 kg/m²
- ✎ Freely moving manual roller door as standard (W x H mm = 2600 x 2500)
- ✎ Side door (W x H mm = 1000 x 2200)
- ✎ Built-in floor safety elements made from 3 mm sheet steel with removable fire galvanized support grids
- ✎ Supplied dismantled with assembly instructions
- ✎ Wide range of accessories

WS-LH 5 x 6, Article No. H62-1210-B, with optional shelving, drive-on ramp and additional outer lacquering

Equipped with shelving and skylight panel in roof (on request)

Equipped with shelving for use as small container store

Water protection storage hall, special version with thermal insulation

If flammable liquids are to be stored then forced ventilation is required.

See practical info on pages 60 and 94!
