

OPEN-AIR STORAGE OF VERTICAL DRUMS

Our standard: natural ventilation and lifting attachments for cranes!

Water protection containers with compartments are for universal use for the storage of drums directly on the support grids or on Euro or chemical pallets. Water protection containers with compartments are particularly suitable for the storage of mixed, non-standardised container sizes.

Series WSC-F-E is intended for one-sided operation; Series WSC-F-D is for two-sided use with lockable doors on each side.

See practical info
on pages 60 and 94!

WSC-F-E.3-30, with hinged doors and natural ventilation,
Article No. C22-5024-C

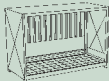

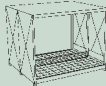

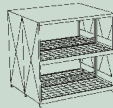

Different versions of water protection containers with compartments:

- ✎ Lockable hinged or sliding doors
- ✎ With natural ventilation
- ✎ Ex-proof version with forced ventilation
- ✎ With PE-HD trough inserts for storing particularly aggressive media
- ✎ Larger collection volumes if required, e.g. for storage in water protection areas or for fire-fighting water retention

Our standard, your benefits:

All the water protection containers with compartments shown on pages 112-115 are provided with natural ventilation for the passive storage of flammable substances (see Practical Info on page 111). This means that they can be used even more flexibly, even if the type of hazardous goods to be stored is changed!

For your attention:

All water protection containers with compartments with an external height of more than 3660 mm are delivered as part-assemblies.

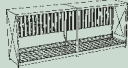

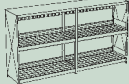

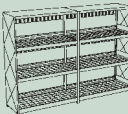

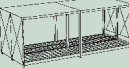

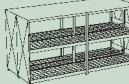

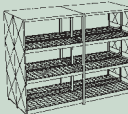

Self-assembly according to the supplied instructions is easy and after only a short time you can use your water protection containers with compartments for storing hazardous substances.

All the necessary connections for the assembly, e.g. floor anchors, nuts and bolts, etc. are contained in the standard equipment. Optionally you can have the assembly carried out by one of our teams of specialists. This applies for all water protection containers with compartments.
