

## OPEN-AIR VERTICAL STORAGE OF CHEMICAL PALLETS

These water protection containers with compartments have been specially designed for the storage of chemical pallets. Optimal utilisation of the available floor space has been achieved for a minimal amount of investment per drum storage place. This series has proven itself to be ideal for storing goods on pallets, e.g. in the chemical industry, in paint factories, etc. and everywhere that sophisticated logistics are important. The series F-E water protection containers with compartments are for use from one side only. Versions for use from both sides are available on request!

**Our standard: natural ventilation and lifting attachments for cranes!**

WSC-F-E.2-80, with sliding doors and natural ventilation, Article No. C22-5324-C
