

## OPEN-AIR HORIZONTAL STORAGE OF 200 L STEEL DRUMS

These water protection containers with compartments for horizontal drum storage are designed so that filling processes are possible within the container.

In the lowest storage level there is a fire galvanised support grid in front of the drums so that liquids can be filled off from the drums into cans or other containers without any problems.

General  
Constructional  
approval DIBt Berlin  
Z-38.5-122

Combination for horizontal and vertical drum storage (with optional roller supports and can support) – price on request

WSC-F-E.2-60/LL, Article No. C22-5405-B
