

FROST-FREE AND HEATED OUTDOOR STORAGE

Description:

As a result of the development of the "WSC Thermocontainers" designed for industrial use it is possible to store thermally sensitive goods safely and independent of the outdoor temperature.

Heating:

The WSC Thermocontainers can be laid out to utilise most of the different types of energy available in factories.

Insulation:

All walls, roofs and floors are completely insulated with thermally insulating fire resistant or fire resistant sandwich elements.

WSC-T-E.3-70

The practically proven construction of the WSC Thermocontainer provides the optimal solution for each application.

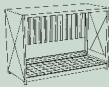

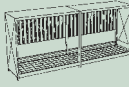

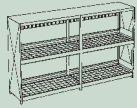

Whether for use with fork-lift trucks, for storing small or large containers – each requirement can be met.

General
Constructional
approval DIBt Berlin
Z-38.5-122

All water protection containers with compartments shown on pages 112 to 116 can be supplied in thermally insulated versions!

FROST-FREE AND HEATED OUTDOOR STORAGE

General information:

- ✎ Protected against unauthorised access by lockable sliding or hinged doors
- ✎ Sliding or hinged doors always 2-part on longer side as standard
- ✎ Inclusion of heating systems bases on hot water, electricity, steam or air circulation possible
- ✎ Can be equipped with air-conditioning
- ✎ All electrical components also available ex-proof versions
- ✎ With grounding connection to prevent hazardous electrostatic charges (for Ex- one 2)
